Overall, both Asics and Adidas offer a range of products with varying prices and ratings. Asics seems to have products in a broader price range compared to Adidas, with some products priced competitively to attract customers looking for budget-friendly options. On the other hand, Adidas products showcase

consistency in pricing with a focus on quality and innovation based on the ratings provided. These pricing strategies could impact Nike by offering customers diverse options at different price points and attracting consumers based on product quality and brand perception.

The promotional campaigns by Asics and Adidas focusing on movement, positivity, and individuality could potentially challenge Nike's market dominance by appealing to different consumer segments. Nike's response to these campaigns will be critical in maintaining its competitive edge in the sportswear market.
